DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 12 are rejected under 35 U.S.C. 102(a) as being anticipated by Best.

Claim 1, Best discloses a receiver circuit for receiving data of source synchronous signals (abstract) which includes a feedback circuit (fig. 4, 112, 15/118, 172/170/, 120, 122) for providing said receiver circuit with a plurality of feedback signals (DSS1, DQN) based on an output of feedback loop of receiver to synchronize data.

Claim 12, Best discloses using uses phase relationship information acquired from a timing reference signal such as a strobe signal to align a data-sampling signal for sampling a data signal that was sent along with the timing reference signal (abstract). Although Best does not use the working of allowing said receiver to integrate said data signal over an entire period of said clock signal, Best discloses that the importance of aligning the data and clock signals is that this allows the receiver to use the whole of the data signal cycle for sampling data (col. 6, lines 55-63).

Art Unit: 2634

3. Claims 2-11 and 13-24 are objected to as dependent upon rejected claims, but would be allowable if rewritten in independent form.
